**RESEARCHER.....Sharon Smith**  
**RECORDER.....Rashidi Nicholls**

A) Wal-Mart stores Inc

B) April 5, 2011

C) New York Stock Exchange (WMT)

D) It seems that Wal-Mart Corporation is coming back and the cost of stocks is increasing with a high of 55.28.

E) Team Black Ops is proud to say that Wal-Mart Stores Inc is doing extremely well. What ever the company is doing to advertise it seems to be working. The weekly high seems to be 55.28. The company has improved on their last week progress. Hopefully the company can keep it by being in articles viewed by the public. Some of these articles are "March retail sales could snap 18-month win streak" and "US Stocks End Slightly Higher As Materials Shares Gain, Technology Sags". This articles help advertise the company and that makes for good business.

**RESEARCHER.....Sharon Smith**  
**RECORDER.....Rashidi Nicholls**

A) Tanger Factory Outlet Centers Inc

B) April 5, 2011

C) New York Stock Exchange (SKT)

D) Team black Ops is reporting that there is a negative slope and bad feedback from this company. The weekly high so far has been 27.39. The company looks like it is going into a bad place. Our shares will be worth less so we will consider removing ourselves from Tanger Factory Outlet Centers Inc.

E) It seems our stock market team, Team Black Ops, is going to drop from Tanger Outlets because of there recent decline. It seems that they turned around last week but they just dropped this week. This is bad for our Team. Our company will buy shares in another mall complex building company like West Field if the company does not improve.

**RESEARCHER.....Sharon Smith**  
**RECORDER.....Rashidi Nicholls**

- A) Hershey
- B) April 5, 2011
- C) New York Stock Exchange (HSY)
- D) It seems that Hershey is doing okay in the market as it stays in a stable state. The corporation is doing well so our stock market team, Team Black Ops, will stay with this company and may purchase more stocks.
- E) Hershey Corporation (HSY) seems to be doing well and is neither going down or up. It's just at an equilibrium going up and down constantly. This is neither good nor bad. If the company stays like this our stock market team will stay with this company until other wise. Hershey has always been a good corporation and our team doesn't see it declining in the near future. So, to keep investing and running with this company is a smart decision of Team Black Ops.
